

Life enhancing experiences.

Life enhancing genetics.

Utah is known for its extraordinary recreation. It's also known for its vast biomedical landscape. From genetics to pharmaceuticals to medical devices, Utah is home to over 300 biomedical companies including Myriad Genetics, Becton Dickinson and the Huntsman Cancer Institute. We also boast an experienced, well-educated workforce and three major research universities—one of which has discovered more disease-related genes than any other university in the world. Just a few reasons to grow your business here. Discover more at: utah.gov/tech
